

## CONTENTS OF VOLUME 33

### *Number 1*

Ten Years of Experience with Leak Detection by Acoustic Signal Analysis H. V. FUCHS & R. RIEHLE (FRG)	1
Sound Insulation of a Rectangular Thin Membrane with Additional Weights NORIHISA HASHIMOTO, MITSUHIRO KATSURA, MASAHITO YASUOKA & HIROYOSI FUJII (Japan)	21
Noise Radiation of (Rectangular) Plane Sources DIETER HOHENWARTER (Austria)	45
Restricted Geometry Acoustic Arrays for Highly Directional Patterns A. A. (LOUIS) BEEX & VICTOR E. DEBRUNNER (USA)	63
Book Review	79
Calendar	81

### *Number 2*

Backscattering of Sound Pulses by Elastic Bodies Underwater DONALD BRILL, GUILLERMO GAUNAURD (USA), HANS STRIFORS (Sweden) & WILLIAM WERTMAN (USA)	87
Effects of Meteorological Conditions and Source Height on Sound Propagation near the Ground CONNY LARSSON & SVEN ISRAELSSON (Sweden)	109
A Miniature Dummy Head for Binaural Evaluation of Tenth-Scale Acoustic Models NING XIANG & JENS BLAUERT (FRG)	123
Free Vibrations of a Timoshenko Beam of Non-uniform Cross-Section Elastically Restrained Against Translation and Rotation at Both Ends R. H. GUTIERREZ (Argentina)	141
<b>Technical Note</b>	
Numerical Experiments on a Vibrating Triangular Plate of Non-uniform Thickness V. H. CORTINEZ, P. A. A. LAURA, A. BERGMANN & R. CARNICER (Argentina)	153

Letters to the Editors . . . . .	161
Calendar . . . . .	163

*Number 3*

A Simple and Effective Correction for Phase Mis-match in Intensity Probes F. JACOBSEN (Denmark)	165
A Procedure, Combining Objective and Subjective Techniques, to Measure the Level-Dependent Attenuation of Electronic Amplitude-Sensitive Earmuffs . A. DAMONGEOT, A. KUSY (France) & B. H. PFEIFFER (FRG)	181
The Fast Field Program (FFP). A Second Tutorial: Application to Long Range Sound Propagation in the Atmosphere . . . . . M. WEST, R. A. SACK & F. WALKDEN (UK)	199
<b>Technical Note</b>	
Sound Systems for High Definition Television . . . . . D. J. MEARES (UK)	229
Letter to the Editors . . . . .	245
Calendar . . . . .	247

*Number 4*

The Sound Insulation of Timber Platform Floating Floors in the Laboratory and Field . . . . . L. C. FOTHERGILL & P. ROYLE (UK)	249
Statistical Analysis of Field Data of Railway Noise and Vibration Collected in an Urban Area . . . . . YOHZO OKUMURA & KAZUHIRO KUNO (Japan)	263
In-Situ Acoustical Investigations of Deep Snow . . . . . H. M. MOORE, K. ATTENBOROUGH (UK), J. ROGERS & S. LEE (USA)	281
Development of Area-Based Methods for Predicting Ambient Noise . . . . . S. J. BAVERSTOCK, R. L. POCOCK & K. ATTENBOROUGH (UK)	303
Universal Prediction Schemes for Estimating Flow-Induced Industrial Pipeline Noise and Vibration . . . . . M. P. NORTON & A. PRUITI (Australia)	313
Calendar . . . . .	337
